

Early Hearing Detection and Intervention (EHDI) Accomplishments

91%
reduction in
Lost to Follow-Up (LTFU) since 2018

Lost to Follow-Up refers to patients who stop attending scheduled appointments or cannot be reached for further care, often leading to worsened health outcomes and untreated conditions.

LOST TO FOLLOW-UP (LTFU), DE EHDI PROGRAM, 2018-2024

Sustained improvement over time

After early system changes, LTFU remained consistently low, with continued reductions through 2023-2024.

Enhanced coordination and data tracking

Improvements in data management, referral tracking, and communication contributed to measurable gains.

Demonstrated accountability and program impact

Clear year-over-year progress highlights effective use of resources and strong program oversight.
